\$6.3 M

Funded: 5% Source: UNHCR, Financial

KEY FIGURES

During the reporting month, Shelter Cluster partners continued to implement, while mostly conducting activities for beginning the implementation of their programs in the second quarter of the year. In the month of March, the Shelter Cluster introduced an interactive dashboard to operationalize the information that partners are reporting from the Cluster 5W and to improve coordination between partners. During the Shelter Cluster meeting for the month of April, partners gave their feedback on eventual updates they would like to see in this dashboard. The Shelter Cluster continues to work with a Kobo tool to improve the accuracy of information that partners are reporting. From this dashboard, one can see that 60% of activities reported to the cluster are still planned. The Shelter Cluster also noted that there is a need to strengthen reporting of activities particularly in the Southwest region. Most of the activities are in nonfood items and not yet in shelter, which highlights the gap for this pressing need in the field. It is therefore also essential, that the Cluster continue to identify improved shelter strategies for IDPs, returnees, and non-displaced particularly in the NW, where shelter assistance was limited in the previous year. The Shelter Cluster conducted a review of the data shared by Plan International on a household assessment funded by UNHCR and compared it with the data shared by IOM and OCHA from the recent Multi-sectoral Needs Assessment. Cluster Partners will be reviewing and analyzing the assessments in workshops coming up in April.

NFI (Total) Targeted: 12 457

Targeted 23 256

COVERAGE AGAINST TARGETS

6.00 people per household
