

Photographer: Armel Dinga Houwe Photo: T-Shelters in the Far North Region built by the International Organization for Migration, June 2021

NEED ANALYSIS

- During the month of June in the North-West region more than 15,000 people got displaced. Most of them need NFI assistance and shelter and 90% among them won't receive any type of relief support.
- In the Far North region the majority of the people staying at the informal settlement sites are in need of shelter materials (plastic tarpaulins, shelter tool kits) and did not receive any assistance since more than one year.

RESPONSE

- In the North-West and South-West regions as of today the Shelter/NFI response could cover only 8% of the population in need by reaching the 16% of the people planned to be assisted under the Humanitarian Response Plan 2021 mainly with emergency shelters through five partners (NRC, DRC, Plan International, SHUMAS, COHESODEC).
- In the Far North during the first semester of 2021 the response could reach only the 9% of the people planned to assist under the Humanitarian Response Plan 2021 mainly with core relief items through four partners (Public Concern, AAEDC, NRC, ACF).

GAPS / CHALLENGES

- Access is becoming more difficult for humanitarian actors in the North-West region due to increase in violence
- According to the NRC report "The world's most neglected crisis", published in May 2021, political inaction is rife, international media attention is sorely lacking and many people are left without any humanitarian assistance to meet their most urgent needs in Cameroon.
