# Working Groups (TWiGs)

with the purpose of mapping primary/secondary data available in the area of Lagone et Birni (Lagone et Chari Division) were social tensions have brought to a L01 emergency with 35,000 people internally displaced and 40,000 seeking refuge into Chad. The group seeks all initiatives that interest Lagone et Birni as area of origin of recent displacement (internal/to Chad) ongoing/achieved/planned to establish together with other analysis groups whether durable solutions are possible, where and why.

#### Responsibilities WG Population Movement:

- 1- Mapping humanitarian and development projects;
- 2- Define categories of information
- 3- List of conclusions per category of information

#### **Shelter Sector Strategy (National)**

Insecurity and property destruction are reported by partners' assessments as the most common reasons for displacement.

In the North-West, South-West, West, Littoral, Centre, and Far North regions of Cameroon a total of **1,2 million people are** considered in need of adequate shelter and essential household items, encompassing Menstrual Hygiene Management (MHM) items in **2022.** This figure includes people directly or indirectly affected by the crises: vulnerable people living in areas of hostilities, internally displaced people (IDPs), returnees, and host families or communities.

#### Situation

Growing violence forces people to flee and most of them are subject to multiple displacements over the year remaining not only uprooted from their homes but also without any decent alternative shelter to protect themselves and their family over the short term.

During 2021 in the Far North an increased number of people had to leave their homes while in the North-West and South-West regions displacement figures remain about the same while pendular displacement continues with consequent disrupted access to markets, loss of household's items and deterioration of shelter materials.

Since 2019, an increasing number of returns were observed to the North-West and South-West. However, 40 per cent returned due to unfavourable conditions, such as problems of integration in the place of displacement, mainly due to lack of infrastructures, access to qualitative basic services, land, livelihood, markets, housing, and social tensions.

High levels of insecurity continue to negatively affect the limited humanitarian space in the North-West and South-West regions,

impeding the shelter/NFI response.

The lack of dignified space, the continued loss or difficult access to household and personal items contribute to the deterioration of the already precarious living conditions by increasing situation of gender-based violence, discrimination, inequity, injustice, isolation, segregation, family separation.

In terms of NFI, soap and menstrual hygiene products are reported as the main needed items among displaced populations in the North-West and South-West, because they are too expensive or because markets are not accessible due to insecurity.<sup>1</sup>

People with specific needs are particularly affected by inadequate shelter conditions and unavailability of household items wherefore their needs are prioritized.

Lack of secure, safe, adequate shelter and essential household items also fosters the use of negative copying mechanisms, such as early marriage, economic exploitation, and other human rights violations.

#### Far North

Cameroonians are attacked in their homes and villages, with children and youth kidnapped and forcibly recruited for fighting and slavery.

People are losing their homes and land, with no documents or prospects for solutions.

According to the various rapid and multisectoral needs assessments carried out by sector partners in the Far North region, approximately 4,000 people (2 per cent of the displaced population) face a catastrophic situation. They are unsheltered and exposed to harsh weather conditions during rainy and dry season.

In the Far North region 40 per cent of the displaced population is reported finding shelter in host families for free, exhausting the already scarce resources of the host, sharing the same room, with less than 3.5m2 covered living space per person. Such overcrowded situations are often linked to improper sanitation and the two factors together drastically contribute to increase the risk of the transmission of diseases such as COVID-19, cholera, and measles.

The situation of self-settled population in rural, non-village settings and informal settlements is also critical as affected people lack basic infrastructure and access to basic services and markets. 22 per cent of the displaced population are reported to live in makeshift shelters constructed with poor quality material, degradable and flammable. This factor, together with the proximity of

<sup>&</sup>lt;sup>1</sup> MSNA, NWSW, OCHA, August 2021.

shelters, contribute to recurrent fire outbreaks, loss of life, and depleting resources of displaced communities.

Moreover, most IDP sites, around 70, did not receive any assistance in shelter material or essential household items during 2021.

In 2021, of 135,000 returnees, 49 per cent returned to their own property, 21 per cent are staying in a new residence and 24 per cent with a host family in their village.<sup>2</sup> A majority had their house destroyed and have lost their main assets, live stocks, household essential items as kitchen utensils, storage containers, water tanks, sleeping arrangements. The loss of these vital needs influences the physical and mental well-being of people.

Seasonal flooding are, after violence, the main driver of displacement in the Far North, which is exacerbating the precarious conditions of displaced and host communities.

#### South-West and North-West

347,542 people are internally displaced in the two regions. Furthermore, pendular displacement is frequent, straining the ability to cope of the affected population. The high intensity of violence continues to affect the daily security of local population and the ability of humanitarian organizations to safely deliver aid since 2017.

In hard-to-reach areas the situation is catastrophic. Approximately 32,000 people are self-settled in the bushes and in immediate and acute need of shelter and household items. The rest of displaced population is reported to have self-settled (52 per cent) in shelter or to stay with host families (48 per cent). Most accommodations across all displaced population (including the ones hosted) are reported to be critically below standards also lacking basic sanitary services.

In the North-West since 2019, almost 251,647 people are reported to have returned from other divisions in Cameroon or from Nigeria to their village of origin. Shelter and NFI needs vary from moderate to severe according to the context they return to and their access to livelihood opportunities.

#### West, Littoral and Centre

In the Littoral and West regions, about 91,199 people are displaced, with 25 per cent living with host families, while 75 per cent have self-settled or are renting. Compared to the North-West and South-West regions, higher percentages of displaced populations are reported to be unsheltered (14 per cent) and living in public buildings (6 per cent). 50 per cent of accommodations are described as acceptable in the Littoral and West regions.

<sup>&</sup>lt;sup>2</sup> DTM, Far North, round 23, displacement report, IOM, July 2021.

In the Centre region, shelter is one of the main issues faced by displaced populations. They are living in highly congested spaces and are often at risk of eviction. In addition, markets are accessible but very expensive limiting access to NFI.

	STRATEGIC OBJECTIVE 1: Reduce mortality and morbidity of X million people affected by crisis								
Country Strategic Response Plan	STRATEGIC OBJECTIVE 2: Reduce the protection needs of X million people affected by crisis								
(SRP) Objectives	STRATEGIC OBJECTIVE 3: Reduce vulnerabilities and strengthen resilience of X people affected by crisis								
	SECTOR OBJECTIVE 01: Provide life-saving shelter and non-food item (NFI) support								
	<ul> <li>Objective Indicator 1.1: Targeted crisis-affected households, including those in protracted displacement, returnees, and host communities, are provided with core and essential non-food items</li> </ul>								
	<ul> <li>Objective Indicator 1.2: Targeted crisis-affected households, including those in protracted displacement, returnees, and host communities, are provided with timely life-saving emergency shelter</li> </ul>								
Cluster	SECTOR OBJECTIVE 02: Provide sustained access to shelter								
Objectives	<ul> <li>Objective Indicator 2.1: Targeted crisis-affected households are provided with safe and sustained shelter support, including those in protracted displacement, returnees, and host communities.</li> </ul>								
	<ul> <li>SECTOR OBJECTIVE 03: Support an enabling protection environment and social cohesion by improving housing and related community/public infrastructure</li> </ul>								
	Objective Indicator 3.1: Increase in adequate housing stock available to targeted households and communities								
	Objective Indicator 3.2: Increased capacity of construction skills of targeted households and communities								

	KEY ISSUE 01: Lack of adequate shelter for population facing protracted displacement						
	People living unsheltered, in below standard and/or overcrowded shelters						
	Action: Coordinate humanitarian assistance and reinforcement of capacity (Cash for Work programs/Trainings)						
	<u>Insecurity</u>						
	<b>Action:</b> Advocate through OCHA Secretariat for robust access monitoring and solid coordination with security forces; support into Hard-to-Reach areas definition criteria.						
	Social tensions						
Key Issues	<b>Action:</b> Integrate social cohesion component in shelter programming ensuring coherent synergies with stabilization/reconciliation programming by the development sector throughout the NEXUS approach.						
	<u>Flooding</u>						
	<b>Action:</b> Promote disaster risk reduction, urban planning capacity mapping with Prefects, Civil Protection and Cameroon Red Cross throughout the NEXUS approach.						
	Seasonal lack of local construction material and design						
	Action: Inform on most favourable procurement period; advocate for a sustained market monitoring and resident/IDPs inclusion in the shelter design and construction material selection						
	KEY ISSUE 02: Chronically underfunded crisis						
	Important funding gap						

Action: Develop a compelling, evidence-based advocacy strategy Multiple crisis ongoing Action: Prioritization across crisis through strategic agreement, contingency stock planning, advocacy for emergency pooled funds with OCHA • KEY ISSUE 03: Harmonization of approaches among crises Shelter/NFI response very disomogeneous among regions and type of crisis Action: The finalization of a Whole of Cameroon Shelter/NFI Sector Strategy through a series of workshops across the main operational areas In accordance with its responsibilities regarding internal displacements and as the Global Lead of the NFIs and Shelter Cluster UNHCR has deployed resources focusing on the implementation of a sectorial needs assessment, the first since the Cluster activation on the 17th of October in 2018. The overall objective of this Project is to increase the knowledge around the IDPs and Host Communities needs in Shelter and Basic Domestic Items in the North-West, South-West, West regions. Specifically, this project seeks to: Contribute to the definition of an evidence informed NFIs/Shelter strategy within the Cluster, through a qualitative and quantitative approach where possible, • Enable evidence informed programming among humanitarian actors Identify Shelter and NFIs needs of IDPs, and prioritizing the most vulnerable among IDP/Host communities, Set more appropriate NFIs/Shelter standards to IDPs and Host Communities exploring alternative modalities, Contribute to the definition of a compelling advocacy strategy, Contribute to an effective fund-raising campaign among traditional/untraditional donors.

**Commented [FLDG1]:** Add OCHA Assessment registry and Narrative with Sector needs assessment

The project has been implemented by sector partners PLAN INTERNATIONAL and DEDI CHAIPDA and data has been collected through households/key informants' interviews during December 2021.

In April 2022 findings have been presented and validated by Cluster partners. Here following are the links to the presentations:

- For North-West Assessment findings click here
- South-West Assessment findings click <u>here</u>

An assessment tracker (Kobo form: <a href="https://enketo.unhcr.org/x/RqFFZAcC">https://enketo.unhcr.org/x/RqFFZAcC</a>) is currently active in the North-West and South-West regions while in the Far North a similar tool will be available at end of May 2022.

An overview of the assessment registry concerning the North-West and South-West regions is available here.

 $\label{lem:condition} A \ multisector \ assessment \ registry \ is \ updated \ quarterly \ by \ OCHA \ through \ all \ humanitarian \ stakeholders.$ 

Here following is an overview of last data collection round (as of February 28, 2022):

Reporting

Monitoring & Evaluation

As of today, the sector main common reporting tool is 5W matrix that is compiled monthly by partners through a KOBO form online in the North-West and South-West (<a href="https://enketo.unhcr.org/x/q1JyQvk8">https://enketo.unhcr.org/x/q1JyQvk8</a>) and through an Excel matrix in the Far north region.

The main information management products are a monthly dashboard and a factsheet per operational area and a quarterly national factsheet. Information management capacity training are planned during the second half of 2022 to improve understanding of technical standards and work towards a harmonization of tools across operational areas.

During the second half of 2022 both Far North Working Group and NW-SW Cluster will hold workshops to establish the vulnerability criteria framework (score cards) that would lead the way for a unified monitoring and evaluation system.

In the meantime, Coordination teams are working to collect Post Distribution Monitoring reports and/or Post Construction Monitoring by partners.

Cluster teams upload photos of partners activities to monitor the response especially in remote areas such as some sub-divisions in the NW-SW regions (Pictures are available here: <a href="https://sheltercluster.org/north-west-south-west/shelter-cluster-partners-activities-photos-nwsw">https://sheltercluster.org/north-west-south-west/shelter-cluster-partners-activities-photos-nwsw</a>) and by the time the gallery will become a referral system for the shelter and settlement dictionary. Similarly in the Far North region the Shelter WG partners share pictures of their activities on a What's Up group.

NW-SW Cluster has dedicated a special page <a href="https://sheltercluster.org/north-west-south-west/pages/damages-and-shelter-needs-nw-region-boyo-division">https://sheltercluster.org/north-west-south-west/pages/damages-and-shelter-needs-nw-region-boyo-division</a> with the intent to document damages and refer to it through simple categories. A Damage Evaluation Sheet will be then elaborated for KOBO and partners trained as enumerators.

received emergency assistance should be able to recover and transit into a durable solution. Several challenges are impeding a smooth recovery by area of crisis among those the stability, local authorities' capacity, poverty index.

The Coordination team is engaging at National level with the NEXUS task force to address some of the challenges and create synergies among humanitarian and development sectors on the following thematic: disaster risk reduction, urban planning, HLP rights.

INT6	rent support	The aim of cash-for-rent intervaccess to shelter. cash-for rent data is available, it is recomme at the division level to determ displaced population represent rental Housing. Cash-for-rent is paid cards, Hawala or direct cash foon); the method and rate of parconditional to some minimum ownership/legal documentation  (a) Minimum standards for each individual should I (b) The provision of cash-for-rent interventions can in sub-standard shelters where relocate to a standard shelter. The shelter can meet the standard.	rentions is two-fold; 1) to protein to interventions primarily targed and that cash-for-rent intervention. It is a large share of the demand directly to the landlord of the protein the whole tenancy agreemyment will be determined by requirements, pertaining to in.  The shelter covered areas are debe granted); for-rent is conditional on the landlord, the tenancy contribute to perpetuation their the landlord, the tenancy contribute to perpetuation their health and safety may otherwise, they can be referdards). It is recommended the	ned to cover rental costs of vulnerable families.  ovide secure tenancy without risk of eviction; and 2) to ensure get refugees living in urban, peri-urban, and rural areas. When reventions consider the specifications of the local housing market was found that districts that face a supply shortage and where are the most vulnerable to price inflation and competition over the property. Transfers are made via cheque, bank transfer, ATM ment or on a set periodic basis (i.e. monthly, bi-monthly, and so the implementing organization. The provision of cash-for-rent is (a) minimum standards for adequate shelter; and (b) proof of efined in the Sphere Handbook (3,5 m2 of living space at least for provision of documents that prove ownership of the space and e. The supporting document is a written lease contract and a trienant, and the organization.  In gexploitative or degrading situations. Therefore, families living to be at risk, cannot be supported with cash-for-rent, unless they red to another shelter programming for upgrading of shelters (if lat organizations guarantee no less than three months of rental notion, it is advised that the rent is capped to the maximum rent

<sup>&</sup>lt;sup>8</sup> Cash for rent Technical Guidance, UNHCR, 2017.

		per District per number of rooms. During the project agencies should conduct regular monitoring to ensure that tenants are still living in the accommodation, the housing is secure and no additional rents are claimed by the landlord. After the project post-activity monitoring is encouraged to monitor outcomes and impact. Shelter actors can support landlords and tenants resolve any arising disputes by: Ensuring that both parties understand their obligations under the contract with agencies taking time to explain the terms clearly; Drafting appropriate contracts; As part of Housing, Land and Property best practices, arranging legal information sessions for landlords and the tenants; Providing a follow-up and feedback mechanism back to the organization.
INT7	reinforcement of capacities	Reinforcement of capacity can be achieved through the following type of activities:  (a) During an owner driven process, where vulnerable people are supported by technical assistance in the rehabilitation or re-construction of their shelters or houses  (b) Under the Cash for Work scheme with 1-3 months rotations, skilled labors can continue improving their skills  (c) As a standalone activity addressed to member partners local staff to improve their shelter technical skills

Commented [FLDG2]: Technical Standards and Intervention
Types – NWSW to be developed

# **Setting Typologies**

In the operational areas the following categories were identified qualitatively based on partners observation in the field, on the assessments available:

# **Extreme North Region**

Setting	Settlement Scenario	Shelter	Structure	Roofs
Urban	Renting, Owner, Hosting, Squatting Public/Private	House  Makeshift Shelter  Collective Shelter	Concrete, Cement, Sundried/Mudbrick	CGI
Semi- Urban	Renting, Owner, Hosting, Informal Settlements, Squatting Public/Private	House  Makeshift Shelter  Collective Shelter	Concrete is less than in urban, Sundried/Mudbrick	CGI, Straw
Rural	Owner, Hosting, Informal Settlements, Squatting Public/Private	House, Makeshift Shelter	Wood, Sundried/Mudbrick	CGI, Straw

# **North-West Region**

Setting	Settlement Scenario	Shelter	Structure	Roofs
Urban	Renting, Owner, Hosting, Squatting	House	Concrete, Cement,	CGI,
	Public/Private		Sundried/Mudbrick	Thatch

		Apartment		
		Collective Shelter (rare)		
Semi-	Renting, Owner, Hosting, Informal Settlements,	House, Apartment, Makeshift Shelter	Concrete is less than urban,	CGI,
Urban	Squatting Public/Private	Collective Shelter	Sundried/Mudbrick	Thatch
Rural	Owner, Hosting, Informal Settlements, Squatting	House, Makeshift Shelter, Farm/Agricultural	Bamboo, Thatch, Wood	CGI,
	Public/Private	house or infrastructure		Thatch

# **South-West Region**

Setting	Settlement Scenario	Shelter	Structure	Roofs
Urban	Renting, Owner, Hosting, Squatting Public/Private	House Apartment Collective Shelter (rare)	Concrete, Cement, Timber Wood	CGI * (Plywood ceilings)
Semi- Urban	Renting, Owner, Hosting, Informal Settlements, Squatting Public/Private	House, Apartment, Makeshift Shelter  Collective Shelter	Concrete is less than urban, Timber Wood, Mudbrick	CGI
Rural	Owner, Hosting, Informal Settlements, Squatting Public/Private, Planned Camps built by Cooperatives,	House, Makeshift Shelter, Farm/Agricultural	Bamboo, Thatch, Wood,	CGI, Thatch

WASH	UNICEF	Ensure shelter sites have WASH facilities. Ensure that there is no overlap in assistance (Hygiene Kit). Action Point: Share NW-SV assessment results on areas lacking WASH facilities; coordinate on WASH Kits contents.	
NEXUS	RC Office	Overall, durable solutions will be promoted through a transfer of capacity to local authorities and stakeholders in the following domain promoted: camp management and camp coordination; disaster risk reduction; house land properties arrangements for informal sites, urban planning. These activities would lay down the basis for sustainable long-term solutions and consolidating a safer environment, security around land and properties tenure, an equitable and inclusive governance. Effective synergies with	

the development actors and local stakeholders are enhanced through the NEXUS platform.
