COORDINATION

HNO 2024: As approval to undertake a multisectoral needs assessment in 2023 was not attained from the Government of Syria, to inform the HNO, the NFI sector utilized 2023 needs estimates with application of a country specific version of the Shelter Severity Classification methodology, incorporating earthquake damage data, and validating the output through expert panel consultations using a Delphi methodology. For NFI, pillar 2 of the SSC framework drives initial needs determination for the NFI sector through indicators which inform the population who do not have or are unable to afford items to undertake cooking (46%), unable to store water & maintain adequate domestic hygiene (20%), unable to achieve adequate sleep quality (42%), and unable to maintain living space and personal warmth (29%).

- **2024 HRP:** Through an activity-based costing (ABC) methodology, the NFI sector developed the sectoral appeal for 2024 of USD 118.9 Million (appeal) and 59.8 Million (critical requirement) to move toward achievement of sector targets in 2024. In Q1 of 2024, partners will be provided the opportunity to submit projects against established appeal targets.
- **SHF 1st Standard Allocation:** This allocation was announced in early October. Strategic and Technical Review of proposal vetting was held on October 5th and 10th where 16 proposals in total were evaluated. 5 proposals did not pass as they did not meet the minimum threshold score or were excluded as they did not meet certain criterion. The review committee recommended 8 projects with a total value of USD2.4 million to reach an estimated of 111,418 individuals with critical winter assistance.
- **Reserve Allocation:** A cost Extensions waiver to address the urgent unmet winter assistance and needs of IDPs in Deir-ez-Zor was allocated to partner whom has existing ongoing projects in the governorate under an ongoing SHF allocations. based on sector's assessments of critical gaps for the IDPs in Deir-ez-Zor that cannot wait for a reserve allocation and require an immediate response. three partners were eligible to receive the cost extension with a total of 747,986 USD.

RESPONSE

- **Core NFI Response:** As of the end of quarter four, sector partners reached over 174K vulnerable people through the provision of Core NFIs across 12 Governorates, with Aleppo & Deir ez-Zor being the areas with highest coverage. The total funding secured for Core NFI interventions in 2023 stands at USD 38.5 M.
- **Winter 2023-24 Planning:** The sector has initiated planning for provision of lifesaving and life sustaining winter NFIs to overcome hard weather conditions. It is estimated that 2.7M people would need winter NFIs during 2023-24 with the sector's capacity being acutely limited to meet these critical needs.

GAPS / CHALLENGES

- The difficult economic conditions continue pose significant challenges to the sector partners particularly in planning and procuring.
- Access and safety continue to be challenges in some parts of the country as well as partner capacity and funding.
