

SW Shelter Cluster Strategy Workshop

27th-28th April 2022

Mountain Hotel

Buea, Cameroon

Cameroon Shelter Cluster
ShelterCluster.org
Coordinating Humanitarian Shelter

Intro/Objectives of Workshop

- Review findings of Plan/UNHCR Shelter Cluster assessment
- Analyse together with other resources such as recent data from the OCHA MSNA as appropriate
- Validate Findings
- Process findings and reflect on how findings can inform the strategic update

Assessment Key Terms and Background

- Plan/UNHCR: Household Survey and Focus Group Discussions
- OCHA MSNA: Key Informant methodology
- Data collection period: Plan/UNHCR: Dec 2021- Jan 2022
- Data collection period: OCHA MSNA: Feb-March 2022

Population Profile

- **UNHCR/Plan HH Data:** In the SW, between 34.99% to 41.01% of the affected population would be IDPs; 12.16 to 17.84 % returnees; and 44.15% to 49.85% non-displaced.

Region	IDPs		Returnees		Non-Displaced	
SW	3.01	38%	2.84	15%	2.85	47%

IDPs in the SW				
Division	Internally Displaced	# of IDPs	Confidence	Confidence
Koupé-Manengo	143	1795	95% +/- 7.86	99% +/- 10.3

Vulnerabilities in our Cluster Strategy

Are there any vulnerable population groups that are missing from the assessment data shared?

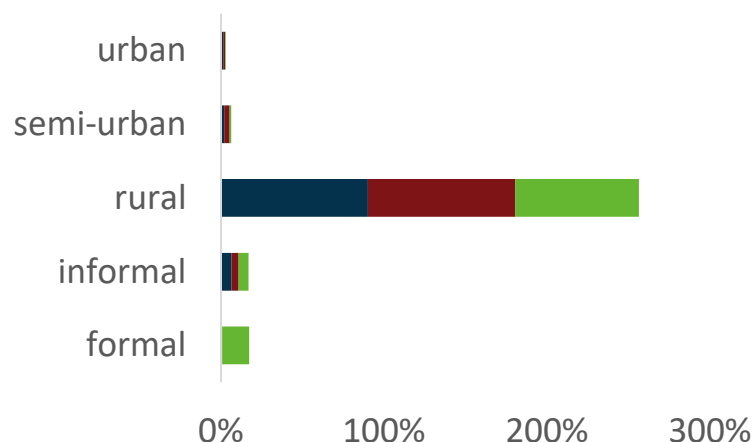

How should our shelter cluster strategy activities target these vulnerable groups?

What should be the prioritization of targeting for these vulnerable groups? Should score card approaches be considered (NWSW 2019 Vulnerability WG)

What kind of mainstreaming in our interventions can we do?

Location Types

Damage to Shelter Plan HH

SW Cameroon: Has your shelter recorded any damage?

SW Cameroon: Level of Damage for those that said their shelter had been damaged

It is important to remember that the respondents are providing their assessment of damages they witnessed, and the enumerators themselves were not technical. No photos were taken of the shelters, so it is also difficult to confirm the respondents' opinion of their status. Also in humanitarian situations, respondents may be stressed by the damaged conditions of their shelters and could lack the technical terms to define the level of damage to their shelters. While language of structurally sound was used, this survey is in no position to make such judgements. In order to try to improve the quality of the data collected, a filter of reporting yes to damage was applied to the following breakdown of results.

Damage by Shelter Type

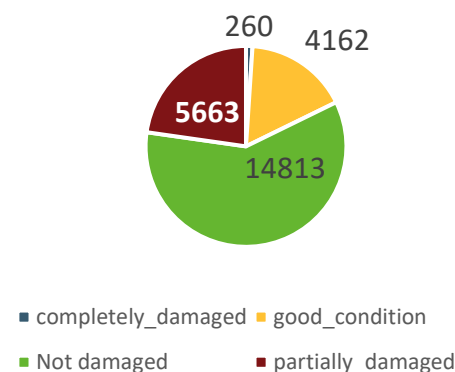

SW Cameroon: Levels of Damage per Shelter Type

Number of IDP HHs in Makeshift Shelters by Condition of Shelters

OCHA MSNA SW: Estimated Returnee Households State of Shelters

	Apartment	Collective center	House	Makeshift / emergency shelter	Public building (school, municipality, etc.)	Tent
Minor damages (only finishings damaged such as painting, floor tiles)	1%	0%	29%	0%	0%	1%
No damage	0%	0%	1%	0%	0%	0%
Severely damaged and inhabitable (structurally no sound so roof and main structure compromised)	1%	0%	25%	0%	0%	0%
Significant damage but habitable (some partition walls, doors, windows but main structure sound)	4%	0%	37%	0%	0%	0%

Housing Types by level of Damage

SW Cameroon Housing Types by levels of damage

	Bamboo	Concrete	Mud bricks	Plywood	Timber
■ Minor damages (only finishings damaged such as painting, floor tiles)	0%	9%	9%	1%	13%
■ No damage	0%	1%	0%	0%	0%
■ Severely damaged and inhabitable (structurally no sound so roof and main structure compromised)	0%	4%	5%	1%	16%
■ Significant damage but habitable (some partition walls, doors, windows but main structure sound)	0%	7%	15%	2%	16%

Damage and Disability

% of HH who report at least one disability who also reported damage to their shelter

Challenges to Repair Damaged Shelters

SW Challenges to Repairs for Respondents who reported Damages

	Internally Displaced	Non-displaced	Retunee
■ Inability to access markets to procure material for repairs / reconstruction Because too far	5%	1%	5%
■ Lack of money for repairs /reconstruction	81%	93%	91%
■ NA, no issues with repairs / reconstruction	7%	1%	2%
■ No one in my household or community that can provide support for repairs / reconstruction	5%	4%	1%
■ No response	1%	1%	1%

Shelter Type and Damage and our Response

How should we classify shelter types in the SW region?

How can collection of photos and better analysis of damages improve our response?

How can we improve the response and ensure minimum standards of habitability of shelter are met in the SW? What about transitional shelter in the SW?

Cameroon Shelter Cluster
ShelterCluster.org
Coordinating Humanitarian Shelter

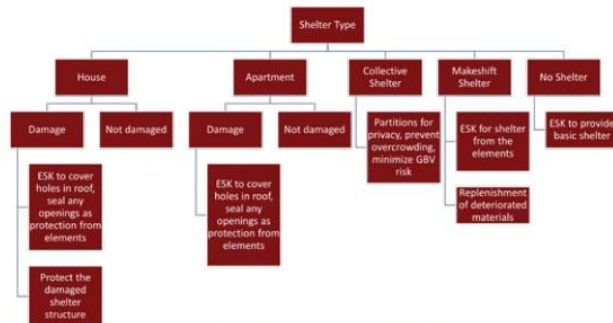

Some ideas for improved standards in the field

Emergency Shelter NWSW Cameroon

Internally Displaced, Returnees, and Non-Displaced people in the Northwest and Southwest Regions of Cameroon frequently state that shelter is among their top three needs. The purpose of the emergency shelter kit is to provide an **immediate temporary response** to the affected population who may not be able to fully achieve all conditions of shelter. Currently, shelter assistance has been particularly challenging in the Northwest region due to the ban on metallic items in the kit. This guidance note aims to support agencies implementing shelter programs in ensuring that the emergency shelter needs of the population are met in both regions and particularly in areas where there are constraints on the provision of a standard kit. What are the applications of the emergency shelter kit per shelter type in the NWSW? The following diagram illustrates the applications of the shelter kit and can help in how to target beneficiaries in need of shelter kits:

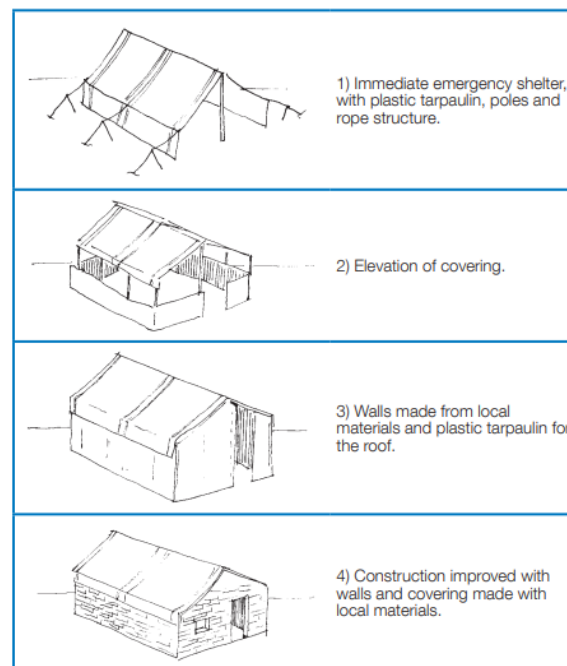

Currently, the Standard Shelter kit and approved items are listed in the specifications on the following page:

B.1.4 Shelter upgrading

Larger pieces of plastic tarpaulin are easier to reuse, so think carefully before cutting plastic tarpaulins.

Plastic tarpaulin can be used as temporary roofing until permanent roofing can be obtained. However it has a limited life span and structures should be designed to allow for this later upgrade

- Monetization
- Roofing
- Training beneficiaries on shelter upgrades and design
- Transitional Shelter Guidelines?
- Environmental impacts

Tenure

SW Land Situation per Population Type

Rental Assistance in the Strategy

Tri-partite agreements and renting on behalf of beneficiaries are the most common methodologies currently – Should other modalities be explored?

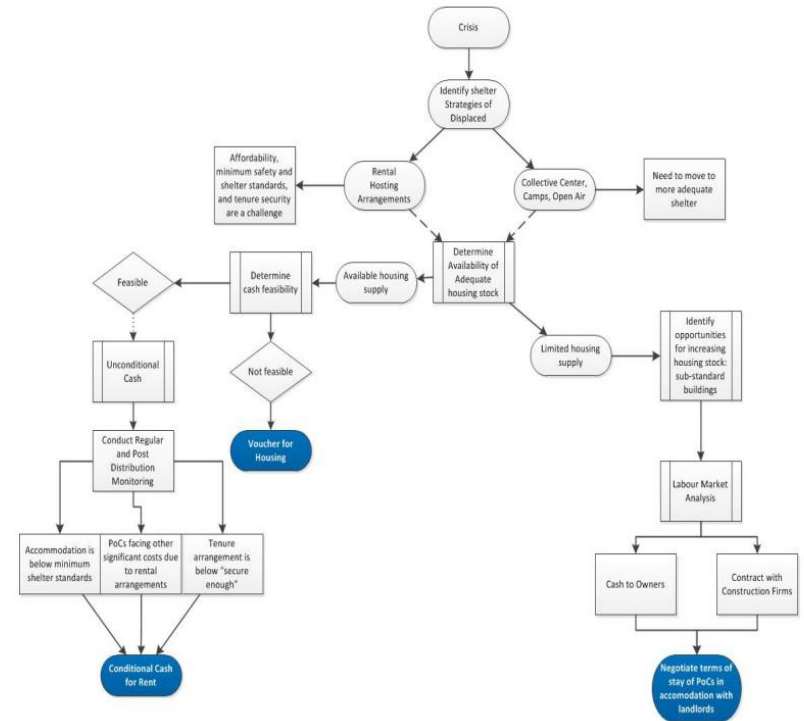

Should there be assistance for those who are already renting found in substandard shelters?

How can our cluster better monitor shelter outcomes of rental assistance?

Rental as a form of a transitional shelter activity

Indicators in Rental Markets

Shelter and Infrastructure

Distribution site layout - schematic illustration

Questions

What is the role in our Cluster strategy for other forms of infrastructure? How do we work with Health and Education Clusters on schools and hospitals?

What does the feedback on distribution points mean for how we conduct distributions and design distribution centers? How do we adapt for vouchers?

What role does settlement planning have in informal settlements to improve the conditions of displaced?

Priority Needs

SW: What would be your priority needs in terms of Shelter?

SW: Top Priority Need by # of Villages

SW: # of Villages Second Top Need

SW: Third Top Need by # of Villages

Humanitarian Assistance (Plan HH)

SW: Has your household received humanitarian assistance in the last year?

SW: Number of times HH has received Humanitarian Assistance

Type of Assistance

SW: Type of Assistance Received

SW: # of Villages with Type of Humanitarian Assistance Received

Coordinating Humanitarian Shelter

Assistance Feedback (OCHA MSNA)

SW: Number of Villages that their residents can access humanitarian assistance

SW: Reasons Why Unequal Assistance to Assistance

SW Problems with Distributions in the Past by Number of Villages

Southwest: Difficulties for Persons with Disabilities to Access Assistance

Accountability in the Strategy

- How can our Shelter Cluster response become more accountable?
- Think about some of the ideas mentioned during the CCPM: referral mechanisms, sharing of assessments/lessons learned, disability mainstreaming, GBV prevention and disclosure

Intentions

Reasons for Staying (Plan HH)

20% of IDPs Living in the SW

■ 20% of IDPs Living in the SW

Reasons for wanting to Return (Plan HH)

SW: 31% of Returnees Top 3 Reasons for returning

Intentions and Integration

- Think through the strategic direction of the cluster strategy in the next several years: how will it support those who want to return? Those who want to stay?
- How will preparedness be maintained for emergency situations while also supporting longer-term and transitional solutions?
