persons with disabilities

RESPONSE

- 24 partners have secured funds for the appeal.
- 28M in secured funding is intended to provide critical life-saving assistance to 781K individuals through winter interventions.
- Assistance for secured funding will be provided in various modalities: 61% in cash, 21% in in-kind assistance, and 17% in voucher form.
- Cash is the most preferred modality for winter response as it allows for complementarity with other interventions and supports diverse winterization needs such as fuel.
- 76% of beneficiaries are residing in IDP camps, while 24% are outside of camps.
- Recommended **life-saving cluster supplies** for winter response include: 1) Heating fuel and stoves, 2) Winter clothes kits, and 3) Winterization kits that include thermal blankets and carpets.
- Here is the link to the [Shelter-NFI Winterization Guidance Note](#).
- Here is the link to the [communities that are not covered or are partially covered](#).

CHALLENGES

- The lack of fund and changed priorities:** Some cluster members with secured fund have reported a change of priorities that resulted reprogramming and shifting their plans to other programmes activities mainly shelter ones.
- The region has experienced recent climate change, resulting in a shift in the winter cycle.
- Delayed response and late fund for winter response: There is an increase in unsustainable negative coping strategies, which is severely impacting the environment and public health. This is also increasing the risks of fire incidents in IDP sites.
